

B1
contd.

C

a photon-transparent ohmic contact for passing light energy therethrough whereby light emission through said surface emitting laser may be monitored.

B2

11. (Twice Amended) A method for monitoring light emission from a surface emitting laser comprising:

C

providing a surface emitting laser as set forth in claim 1;

contacting said laser with a source of energy to generate light; and

monitoring emitted light transmitted through said photon-transparent ohmic contact.
